WORK EXPERIENCE

Software Engineer

Flextrade Systems (Domain: Finance)

01/2020 - Present

Pune

FlexTrade Systems is a global leader in high performance multi-asset EMS and OMS for equities, fixed income, foreign exchange, futures, and options.

Responsibilities

- Worked on an Internal project from scratch based on React as frontend and python as backend (Golang used for some tooling)
- Awarded best project for the year 2020 and received appreciation from CEO, VP and client services team.
- Implementation of ssh based scripts & code execution on different servers much like AWS. Showing 50M logs on UI, optimizing html rendering, lazy loading and implemented various optimization techniques.
- Implemented monitoring system for CPU, Mem and Disk usage on deployed servers. Helped client services team to counter high disk usage and mem usage easily.
- Implemented and Integrated various flextrade company products. This enabled client services team to login at one place and view all at just a click.
- Implemented live backend logs fetching using golang and filebeat.
- Migrated to docker based deployment which reduced the deployment to a much greater extent.

Software Engineer

Vistaar Technologies (Domain: Medical Pharma)

07/2017 - 01/2020

Mumbai

Vistaar based in UnitedStates offers pricing software solutions and services across a range of industries

Responsibilities

- 2.4 years of experience in the areas of product development and testing with role responsibility right from analysis, coding, testing to deployment.
- Worked as individual contributor for developing software screens using ExtJS for front end and Rhino Engine JS for the backend logic.
- Monitoring setup logs, Uptime/Downtime of Production servers on Kibana. Building Automation Scripts in Linux for various operations.
- Server Maintenance(Setup Creation/Backup/Maintain). Also, Drop and Artifacts Deployment on the Production server. Database Management (Import/Export Dumps).
